

FASTCAM MC2

HIGH PERFORMANCE H.S. VIDEO SYSTEM

High Speed Video System developed specifically for production line and automation fault finding

The FASTCAM MC2 has been designed to meet the requirements of development and production engineers in manufacturing and automation environments:

- A robust system with one or two remote camera heads that are small and light weight enabling it to be positioned in inaccessible and space limited environments.
- A light sensitive CMOS imaging sensor allowing images to be captured with minimal additional lighting.
- High frame rates and image resolution to allow clear visualization and motion analysis.
- Operational features necessary for recording in production environments including optional handheld remote controller with built-in LCD display.
- Gigabit Ethernet interface, complete with automatic download to users network.

Benefits

- Two small and lightweight camera head types:
 - Cube Cam: 35mm (1.38") x 35mm (1.38") x 33.3 mm (1.31")
 - Pencil Cam: 23mm (0.91") x 23.2mm (0.91") x 77.1mm (3.04")
- 2,000 fps (frames per second) recording rate at full image resolution
- Rugged design for use in industrial environments. Remote camera head with 7 meter cable allows positioning in difficult to access locations
- Three model options (monochrome or color):
 - **Model 500**: 512 x 512 pixel resolution at frame rates up to 500 fps
 - **Model 2K**: 512 x 512 pixel resolution at frame rates up to 2,000 fps
 - **Model 10K**: 512 x 512 pixel resolution at frame rates up to 2,000 fps and frame rates up to 10,000 fps with reduced image resolution
- 1GB (4 seconds recording time at 1,000 fps) or 2GB (8 seconds recording time at 1,000 fps) memory
- Gigabit Ethernet control via Photron FASTCAM Viewer (PFV) software
- Optional handheld remote controller with integrated 5" LCD monitor for simple control of all functions and viewing of live and recorded images
- High speed video can be synchronized with external analog data from load cells or accelerometers with optional DAQ
